

SIMWG

Stock Identification Methods Working Group

Human Activities, Pressures and Impacts Steering Group (HAPISG)

RESEARCH FOCUS

- Annual updates on recent applications of stock identification methods to species assessed by ICES and on advances in stock identification methods
- Addressing requests by ICES expert groups for technical advice on issues of stock identity

OUR OBJECTIVE

SIMWG's annual reviews on advances in stock identification methods keep ICES members abreast of best practices in this field of study. SIMWG expert reviews on questions of stock structure for particular ICES species contribute to the accuracy of stock assessment and effectiveness of management actions.

OUR EXPERTISE

SIMWG members provide a wide expertise on genetics, growth marks in calcified structures, life history parameters, morphometrics and meristics, tagging, otolith shape, otolith chemistry, parasites, and interdisciplinary approaches.
