

# WGAcousticGov

## Working Group on Acoustic Trawl Data Portal Governance

Data Science and Technology  
Steering Group (DSTSG)

## RESEARCH FOCUS

- We deliver a product (data portal) to suit stock assessment working groups needs.
- The WG operates through quarterly meetings to be reactive to user feedback.
- The group will coordinate the development of user guidance and training through workshops and user manuals to encourage Portal use within the ICES community.

## OUR OBJECTIVE

The WGAcousticGov group was established with the goal of providing a governance framework for the ICES Acoustic Trawl Data Portal for the continued and future development of the portal and to meet the requirements of end users and the wider community.

## OUR EXPERTISE

- We use the expertise and knowledge of data providers from existing expert acoustic survey working groups (WGIPS, WGACEGG, WGBIFS, WGIDEEPS)
- We use the expertise and knowledge of those involved in the development of acoustic methodology, metadata standards and sampling gear technology and within ICES (WGFAST, WGFTFB)
