## RESEARCH FOCUS

- Better understand environmental (especially climate change) effects on the living marine resources of the Western Baltic Sea and its dependent fisheries.

## OUR OBJECTIVES

- Support stock assessments and ecosystem-based advice for Western Baltic fish stocks.
- Develop climate adaptation measures for the Western Baltic Sea
- Simulate and discuss potential futures of the Western Baltic ecosystem, its fish community and the dependent fisheries.

## OUR EXPERTISE

- WGECOBAL intentionally follows a holistic approach, and we hence hope to involve a broad expertise in related marine natural and social sciences (of all kinds).
