RESEARCH FOCUS

- Produce science to promote adaptive and holistic marine management strategies in the Baltic Sea
- Analyse long-term trends and develop methods and tools for integrated assessments.

OUR OBJECTIVES

- Develop food web indicators
- Develop ecosystem knowledge to support ecosystem-based fisheries advice
- Develop a range of decisionsupport tools for integrated ecosystem-based advice.
- Revise the Baltic Sea Ecoregion Ecosystem Overview

OUR EXPERTISE

- Integrated trend analysis (ITA)
- Ecosystem modelling
- Food web ecology
- Ecosystem indicators (e.g. MSFD, HELCOM)
- Fisheries science
- Decision support tools
- Quantative analysis
 - Integrated trend analysis
 - Bayesian networks
 - Ecological network analysis
 - Stable isotopes
