RESEARCH FOCUS

- Develop scientific support for Integrated Ecosystem Assessments (IEAs) of the Northwest Atlantic region.
- Support ecosystem approaches to science and management.
- Provide guidance to effectively link scientific knowledge and management through the IEA process.

OUR OBJECTIVE

To improve regional capacity to produce and effectively communicate science to support ecosystem-based management by developing biological, physical, climate, social-cultural, and habitat indicators, and tools to improve accessibility and coproduction of knowledge across disciplines, communities and regions.

OUR EXPERTISE

- We have a diversity of disciplines and expertise among our membership including:
 - Fisheries science
 - Ecosystem modelling
 - Oceanography
 - Climate science
 - Resource management
 - Social science
 - Economics
 - Anthropology
