

WGNAS

Working Group on North Atlantic Salmon

Fisheries Resources
Steering Group (FRSG)

RESEARCH FOCUS

- Overview of harvest, catch and release, unreported catches, and production of farmed and ranched salmon
- Overview on development of biological reference points and compliance
- Significant new or emerging threats to, or opportunities for, salmon conservation and management
- Compile tag releases for the North Atlantic
- Identify relevant data deficiencies, monitoring needs, and research requirements

OUR OBJECTIVE

- Developing the science to support ICES advice in response to questions posed by the North Atlantic Salmon Conservation Organization (NASCO).
- Assessing the status of salmon stocks across the North Atlantic.
- Developing multi-year catch advice for the Faroes and West Greenland fisheries.

OUR EXPERTISE

- Members from countries throughout the North Atlantic
- Experts in stock assessment, catch advice, salmon life history, impact assessment, advice provision, etc.
