

WGSFD

Working Group on Spatial Fisheries Data

Human Activities, Pressures and Impacts Steering Group (HAPISG)

RESEARCH FOCUS

- Develop effort indicators for passive gears and small-scale fisheries using high resolution spatial data from various technical platforms (VMS, AIS, GPS)
- Incorporating habitat information into data products
- Develop and maintain quality of ICES data call and data products

OUR OBJECTIVE

The expert group collates and analyses spatial fisheries data to evaluate fishing effort, intensity, and frequency in European waters.

OUR EXPERTISE

- GIS and mapping
- Spatial data - analysis and modelling
- Fisheries in the Northeast Atlantic
- In-depth knowledge of data sources such as fishermen logbook, vessel monitoring system (VMS) and automatic identification system (AIS)
