How to get access to the comparison reports?

The comparison reports are publicly available for everyone from this link:

<https://datras.ices.dk/DATRASApp/Reports/>

USEFUL LINKS

and also in the links to the individual reports shown in the submission status page:

https://datras.ices.dk/Data_products/Submission_Status.aspx

BITS	1991	1	DK	26D4	2	08/06/2004 15:38:00	Report

How to receive alerts for specific resubmissions comparison reports?

If you want to receive email alerts anytime there is a resubmission with changes for any combination of Survey, Quarter, Year, Country and Species, you need to log in with your ICES SharePoint credentials clicking on the Resubmission Alerts Registration link in the <https://datras.ices.dk/DATRASApp/Reports/>

Please remember you don't need the *ices/* part of your username:

Is any change in the resubmission reflected in the reports?

No. The list of available checks that will create a comparison report is available here:

Link

These checks cover all variables involved in the calculation of the Data Products (CPUE, ALK, SMALK...). ICES Data Centre will receive requests and recommendations from the different stakeholders of DATRAS and will increase and/or modify the checks accordingly, ideally once per year.

What species are available for comparison reports?

A limited list of species, covering the target species and those of higher interest for assessments, has been agreed with the chairs of the surveys Working Groups. If you miss a report for a certain species for your Survey of interest, please send a message in the *Send Feedback* option on the app, or directly emailing to DatrasAdministration@ices.dk

Since when are resubmission reports available?

The resubmission reports cover all resubmissions happening since Quarter 2 2023. Resubmissions done before that date are unfortunately not included in the application.

How many resubmissions are available for a certain file?

The app has the capacity to show up to 5 resubmissions for the same file since Q2 2023. In cases where more than 5 resubmissions happen, the app will readjust and will show any amount of resubmissions happened during one year before the last resubmission.
