Introduction

At the third meeting of the ICES Working Group on Effects on Fisheries of Marine Sand and Gravel Extraction - Rijswijk (Z.H.), the Netherlands, 21 - 23 March 1979, it was recommended: (4) That a summarizing bibliography should be prepared by members on all relevant topics related to dredging (including documents by the Working Group) and be sent to the Working Group Chairman for submission as a draft to the MEQ Committee at the 68th Statutory Meeting and that additional information should be submitted annually to the MEQ Committee under a separate heading.

Only the members of France and the U.S.A. have sent references to the Working Group Chairman.

The compiled data are derived from the previous Working Group reports and the authors reference system.

Comments and additions are kindly requested in order to publish the final version of this draft next year.
