

Advance Release of Tables 1-5 and K

of

BULLETIN STATISTIQUE

Volume 64, 1979

Not all countries included

(See Introduction)

## INTRODUCTION

The Advance Release of Tables 1-5 and K of Bulletin Statistique, Volume 64 (for 1979) has been reproduced from computer print-outs prepared by the ICES Secretariat, using part of the ICES FISHDAT System.

There are no changes in the format of this Advance Release in comparison with the previous one issued for the 67th Statutory Meeting (Doc.C.M.1979/Gen:3).

Unfortunately, the present issue contains no catch data from Denmark, France, the Federal Republic of Germany and Greenland, since no completed STATLANT 27A forms were received from these countries by the time the preparatory work on this document had to be finalized (11 September 1980).

It should be noted that figures for U.K. (England and Wales) include catch statistics for Channel Islands (Guernsey), and that the Finnish, Norwegian and Swedish data have a preliminary status. Finnish nominal catches include certain quantities caught in recreational fisheries.

In accordance with the Council's decision at the 67th Statutory Meeting, two of the standard 3-Alpha identifiers of species items, appearing in the extreme right-hand column of Table 5, have been changed. For Bluefin tuna "BLF" was changed to "BFT" and for Sea urchins "URC" was changed to "URX".

Inventories of data for 1979, which were previously incorporated in the Statistical News Letters, are annexed to the present issue.

For the North Sea, Faroes Grounds, English Channel and East Greenland, where catches have not been split between Divisions, the figures given for one of them include catches in the other marked by "...".

Following the practice agreed upon by the Statistics Committee at the 1974 Statutory Meeting, national statistical offices are requested to check any discrepancies between the catch figures reported in Table 5 and corresponding data which they may have available and to promptly inform the ICES Secretariat.

The following standard symbols are used in this issue:

- + magnitude less than half the unit used in the table
- magnitude known to be nil
- ... { magnitude not available, unobtainable  
      { data not separately available but included elsewhere

Vadim Nikolaev  
Statistician

ISSCFG Abbreviations

- GND - Drift nets
- GNF - Fixed gillnets (on stakes)
- LX - Hooks and lines (not specified)
- OTB - Bottom otter trawls
- OTM - Midwater otter trawls
- PTB - Bottom pair trawls
- TBB - Bottom beam trawls
- SX - Seine nets (not specified)
