

WGBEC

Working Group on Biological Effects of Contaminants

Human Activities, Pressures and Impacts Steering Group (HAPISG)

RESEARCH FOCUS

- Developing strategies for integrated monitoring of biological effects.
- Providing advice on appropriate methods for monitoring.
- Increasing the fundamental understanding of ecotoxicological processes.
- Understanding interactions between contaminants and other environmental processes.

OUR OBJECTIVE

The objective of WGBEC is to examine the biological effects of contaminants in the marine environment, to improve understanding and research of such pollutants, and to aid international research and monitoring.

OUR EXPERTISE

- Ecotoxicology of hazardous substances.
- Effects of contaminants on marine organisms.
- Quality assurance of biomarkers.
- Assessment of marine pollution.

OUR CHAIRS

Steven Brooks

Juan Bellas
