

WGEEL

Working Group on Eels

Fisheries Resources Steering Group (FRSG)

RESEARCH FOCUS

- The Joint EIFAAC/ICES/GFCM Working Group on Eels (WGEEL) conducts the annual stock assessment for European eel.
- We report on new science, including emerging threats and opportunities.

OUR OBJECTIVE

Following the drastic decline of recruitment in the European eel after the 1980s, many efforts were undertaken by policy-makers to facilitate the recovery of the stock. WGEEL's role is to describe the current stock status and improve our understanding of its dynamics in order to inform policy-makers and provide the scientific basis for the advice.

OUR EXPERTISE

- Developing tools and methods to compile and analyze comprehensive data on the widespread single stock of the European eel.
- Reviewing impacts of both anthropogenic and non-anthropogenic factors on the stock.
